Piezo-Bridges:

ABM provides Piezo-Configurations for all bridges (except series 24XX/25XX/3024). These items are made "just in time" so an average lead time of 8 to 10 weeks could occur. Please ask for a quotation.

We use custom made GRAPHTECH transducers and recommend to use the GRAPHTECH preamp or Midi converter. Third party equipment may cause an impedance mismatch! GRAPHTECH transducers are very dynamic and have got a high output so third party preamps in their input sections may distort.

The Shipment of Piezo-Bridges (or sets of single Bridges) includes Transducers (with Allen key if needed) and wiring (sockets, sum board and sum cable). The preamp is available in music instrument stores. Please ask your national GRAPHTECH distributor.

Piezo

The prices for transducer-equipped bridges vary. Feel free to ask for an offer. Each bridge is build to order.

ABM Custom-Shop:

Based upon our serial products we produce variations as custom hardware likely. Even in a one-piece way. Please note that machinery setup and handling costs could be much higher than on serial items.

Why ABM?

We are committed to the principle of fair trade and production:

We follow dignified conditions of team-work, human rights and high environmental guidelines of the European Union!

Our intention is to give ABM-products the best sound on its way!

We do not produce weak and sound lousing die-cast products, but shape our parts from solid metal by state-of-the-art CNC machines or manually. Almost seven decades of precious craftsmanship and tradition meet the future.

Precision working on solid metal is our passion!

Bell Brass, Aluminum and Carbon Steel are the base for your project ideas and our products. Our main job is to manufacture unique Guitar Parts, designed, engineered and produced in Berlin - 100% Made in Germany!

We provide one of the best possible sanding, polishing and plating quality!

Our surfaces support great Guitar tone with a long lasting abrasion proof performance and a wonderful finish. The black chrome plating is probably the best in the world and our gold is a real 24-Karat plating.

ABM Products are not low prized but more than worthwhile!

Every Guitarist wants to bring out the best from his instrument. Our target is to build parts to make his dream come true. An ABM Bridge will expand the tonal quality of your instrument drastically! Many musicians tell us that ABM-Parts provide an open and full sound spectrum that was hidden in the wood before. A great appreciation of tone and value for your instrument.

Distribution/Information

Please contact us directly for product information or order wishes by naming your address and contact data.

Commercial customers from the EU provide the VAT-ID or a copy of business registration in case of living outside the EU. Please name your telephone contact too.

OEM requests and spare-part orders are always served by ABM directly and worldwide.

Distributors, Reseller & Luthier get discount for their local ABM support! (Please ask for your discount scale!)

Offer/Order/Payment

Requests for an Order/Order Confirmation:

Please appoint your full name, complete address, telephone contact and your status: private or commercial. Please provide the previous email-traffic for quick a replay. Commercial EU-Reseller and Luthier specify their EU VAT-ID for payment without tax.

Payment

Payment in advance by money transfer or by PayPal without further rebate. For PayPal money transfer please use our email address: "abm-info@arcor.de" as payee.

Shipping: DHL national: Fully insured with tracking-ID, FedEx worldwide fully insured with tracking-ID.

OEM Requests/Custom ABM Products/ CAD Data/ Custom Plating/Aging/ Piezo-Pickups

It is our main job to build guitar parts for guitar companies in larger scales, but we can also build your "own" bridge too. For a one-off or sample production we recommend a production quantity of 5 pieces, as we have to merge one time costs for CAD machinery setup, test drives and production. If you plan a small series, a charge of 25 to 50 pieces is the economic minimum. CAD data are welcome! Please ask for the perfect format or provide for 3D Design "PRT" or alternatively "IGS" or "STEP", for 2D Design please use "DXF". Please note, that custom parts could have a lead time of 12 to 16 weeks depending of production capacity.

Custom Parts designs from a serial item.

You can spare time and money by choosing a serial ABM product to be modified for your needs.

Costs will be much lower and the lead-time shorter because we hold a variety of "half-finished" Guitar parts on stock.

Custom Plating

We offer a great variety of custom metallic surfaces from high-gloss to sanded matt finishes. To follow custom orders successfully we need a minimum order quantity of 10 pieces (for compact bridges) and 60 pieces (for single bridges) for each finish.

Aging

Please note that we sell our products in a "medium aged condition" that matches an often played but well-tended instrument. If you like a "Heavy Relic-Design" that looks really worn out and dirty, please define that fact before you order. Thank you.

General terms and conditions apply
