

ABM6220 Adjustable Guitar Nut

Description :

- milled and turned of solid Bell Brass
- replacement for Strat-Style nuts with cut out
- individual height adjustment of 2 mm on each string
- adjustment screws with crossed V-shape notches

! The saddle must be glued to correct assembly!
Please remove first the height adjustment screws.

! It may occur at very low string height that the screw-end passes through the underside of the saddle out. Please check before mounting the saddle the necessary height adjustments and provide the neck with corresponding holes.
